Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-12 and 24-30, drawn to eyewear includes a removable shield for reducing direct impingement of moving unfiltered air, classified in Class 351, subclass 62.

II. Claims 13-19, drawn to eyewear includes a nose-contacting element attached to the half jacket frame, classified in Class 351, subclass 138.

III. Claims 20-23, drawn to includes lens-retaining ridge, classified in Class 351, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I, II, III recites limitations not recited in any of the other invention. The differing limitations make the inventions I, II, III patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I, II, III would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
